LIGHTING

1. Ambient: Recessed Ceiling Lights + Big Windows provide primary natural ambient light during the day, supplemented by task lighting for even overhead illumination at night.
2. Task lighting, when hung over the island or counters for food prep, provides focused, downward light.
3. Under-Cabinet LED Strips deliver focused light for chopping, cooking, and cleanup.

Floor Finish :

Floor Finish: Light Oak Wood

Recessed lights + natural windows warm the oak's golden tones. Task lighting pendants eliminate walking shadows for safe navigation as well as under-cabinet glow, which prevents nighttime trips while keeping wood vibrant, not dull.

Wall Finish: Silent White - Deep™ Paint

Big windows make a warm white glow and reflect light room-wide.

Recessed ambient keeps walls crisp/spacious, pendants bounce golden light off them, perfect for social gatherings without harsh glare.

Millwork (Cabinetry) :

Daylight shows true wood depth;
pendants highlight rich
grain/handles with soft contrast.
Under-cabinet strips ensure clear
visibility for grabbing items;
recessed light balances dark
tones against the walls for easy
organization tasks.

Countertops: Marble Stone

Natural light activates veining, shimmer lantern pendants deliver shadow-free precision for chopping/serving. Under-cabinet strips highlight marble texture cleanly, ideal for food prep accuracy and elegant appearance.
